HOW TO USE THE DIAL TELEPHONE

First obtain the new telephone number from directory. If the desired name is not in the directory dial "123" for information.

HOW TO DIAL

IN REMOVING THE RECEIVER BE CAREFUL NOT TO JIGGLE THE HOOK. If you jiggle the hook in removing the receiver, or while dialing, it will result in a wrong number.

LISTEN FOR DIAL TONE. The dial tone is a steady humming sound which indicates that the line is ready for you to make your call.

TO DIAL ANY FIGURE place your finger firmly into the hole in the dial through which the figure is seen. Pull the dial around until your finger strikes the finger stop. Then remove your finger from the hole and let the dial return until it stops in the normal position. Do not touch the dial while it is turning, because any attempt to hasten or retard its motion will interfere with the operation of the equipment and may result in a wrong number. Keep the receiver off the hook while dialing.

If, while dialing or upon completion of dialing, a sound similar to the busy tone is heard on the line, it indicates that some mistake has occurred on the call. The number should be verified with the latest directory and then dialed again.

If an error is made while dialing, hang up the receiver for a moment, then remove the receiver and dial the entire number again as described above.

THE BUSY SIGNAL

The busy signal is a rapid "Buzz-Buzz-Buzz" sound and informs you that the called line is busy. When you hear this signal, hang up the receiver and call again after a reasonable time. To become familiar with the busy signal, dial your own number and listen.

PLEASE DO NOT MOVE THE DIAL while talking as it may break the connection.

IN CASE YOU HAVE REPEATED TROUBLE DIALING A NUMBER, hang up for a few seconds, THEN DIAL "O." The operator will be glad to assist you with your call.

THE RINGING SIGNAL

The ringing signal is an intermittent "Burring" sound which informs you that the bell of the called telephone is ringing.

DETAILS TO OBSERVE

ON PARTY LINE

Always listen for the dial tone before starting to dial to make sure the line is not in use. If a conversation is heard, hang up the receiver and wait for a reasonable time before making another attempt. If, while dialing, or after you have dialed, you hear another party on the line, or hear successive clicks on your receiver, it indicates that some other party on the line is trying to call. Inform the other party that the line is in use. When the other party leaves the line, if you have completed dialing and hear the ringing signal, remain on the line, but if you have not completed dialing, hang up your receiver for a few seconds, then remove it and dial the complete number again as described above.

(Continued on Inside Back Cover)
"BEEP" TONE TELLS WHEN TELEPHONE CONVERSATION IS BEING RECORDED

A short high "beep" tone heard on the telephone line about every 15 seconds means that the person with whom you are talking is recording your conversation by means of his electrical recording machine connected to the telephone line.

This signal is provided by the telephone company for your protection. If you do not want a record made of what you are saying, ask the person with whom you are talking to disconnect the recording machine. When he disconnects his recorder the signal is no longer heard.

The "beep" is produced automatically by the device used to connect the recorder to the telephone line. It stops when the recorder is disconnected. Use of a recorder without this signal is unlawful.

BILLING AND PAYMENT FOR SERVICE

Monthly bills for telephone rental are issued in advance and are payable in advance and are due upon presentation. Long distance charges for the month preceding are included on the current bill. Long distance charges are billed up through the 11th day preceding the date of the bill.

When paying in person at the business office it will save you time if you have your bill with you. When paying by check please enclose the bill stub with your check. If the stub has been mislaid, you can make certain that your account will be promptly credited by writing your telephone number on the check.

If you desire additional assistance or explanation regarding your bill, please call the business office.

For information regarding Bills Rendered, call local business office.

When you take down your telephone to dial, a few seconds are sometimes required for the equipment at the central office to get ready to serve you. When it is in position, you hear a notifying hum, a “dial tone,” corresponding to an operator’s “Number please?” If you will wait for this dial tone, it will speed your calls!

**A Sound to Remember**

When dialing, be sure you hear a humming sound before making your call. This "hum-m-m" is your signal that the equipment is ready to take your call. If you dial before hearing this signal, you are apt to get a wrong number or no number at all. You'll get better use from your dial telephone if you remember to listen for the dial tone.
Value-wise people these days are making their long distance calls after 6 PM and on Sunday.

Rates are much lower during these less busy hours, and service is much faster too. So plan on doing more of your personal long distance telephoning after 6 PM or on Sunday. It's the thrifty thing to do.
"BEEP" TONE TELLS WHEN TELEPHONE CONVERSATION IS BEING RECORDED

A short high "beep" tone heard on the telephone line about every 15 seconds means that the person with whom you are talking is recording your conversation by means of his electrical recording machine connected to the telephone line.

This signal is provided by the telephone company for your protection. If you do not want a record made of what you are saying, ask the person with whom you are talking to disconnect the recording machine. When he disconnects his recorder the signal is no longer heard.

The "beep" is produced automatically by the device used to connect the recorder to the telephone line. It stops when the recorder is disconnected. Use of a recorder without this signal is unlawful.

BILLING AND PAYMENT FOR SERVICE
